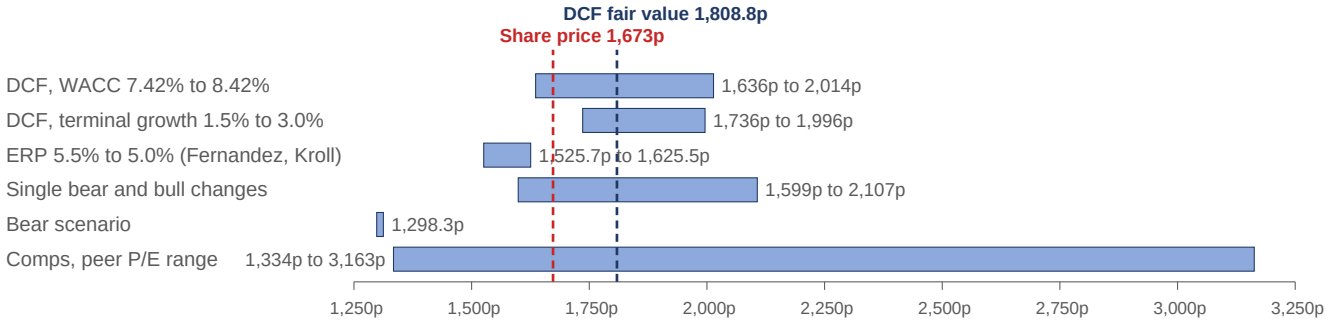
Diageo plc (LSE: DGE)

HOLD	Fair value 1,808.8p	Share price 1,673p (12 Oct 2026)	Upside +8.1%	Bear case 1,298.3p

Desk rating: HOLD (PM confirmed; re-run 15 Oct 2026 after evidence audit). Rule: BUY at +15% or more, SELL at -10% or worse; no override. **SELL starts at 1,506p, 303p below fair value; BUY starts at 1,924p, 115p above it.** Per-share values are pence per ordinary share (GBp); the DCF is in USD m. Was 1,627.3p (-2.7%) on 13 Oct: the change is the equity risk premium (ERP 5.0% to 4.2%, +183.5p) and the corrected share count (2,224m, -2.0p).



Thesis

- **Fair value is a little above the price, and that rests on the discount rate.** The DCF gives 1,808.8p (USD 23.94), 8.1% above 1,673p. The price implies a WACC of 8.30% (ours 7.92%), or an ERP of about 4.78% (ours 4.2%). At Kroll's 5.0% ERP the value is 1,625.5p, below the price.
- **Self-help is the whole profit story.** Organic net sales fell 2.0% in FY26 and North America fell 8.4%. The c.USD 1,000m savings plan drives profit growth; we assume 46% of it reaches profit, the low end of FY27-29 guidance.
- **The balance sheet limits the upside.** Leverage is 3.14x against a 2.5-3.0x target and the dividend has been cut. Disposal proceeds (USD 3,318m gross) had not been received at 30 June 2026.

Valuation

DCF in USD m, valued at 30 June 2026 with mid-year discounting, rolled forward to 12 Oct 2026 at the cost of equity, converted at USD 1.3234 per GBP (FRED, 2 Oct 2026).

- **Growth path:** base net sales USD 18,505.5m (ex-EABL); organic growth 0.0%, 1.5%, 2.5%, 3.0%, 3.0% (FY27-31). The FY30-31 3% has no source; 2% gives 1,778.8p.
- **Savings flow-through:** 46% of cumulative savings (USD 377.5m, 962.5m, then 1,000m) reaches operating profit.
- **WACC 7.92%:** risk-free 5.22% (US 10-year, FRED, 8 Oct 2026), beta 0.96 (industry bottom-up), **ERP 4.2%** (Damodaran implied ERP for the S&P 500, 1 Oct 2026; seen only in search summaries, PM to confirm on Damodaran's site; the old 5.0% had no source), cost of equity 9.25%; pre-tax cost of debt 6.22% (risk-free + 1%); debt weight 29.4%.
- **Terminal:** growth 2.0%; terminal capex 6.21% of sales (new investment earns FY26 ROIC of 13.4%). **Terminal value is 76.7% of EV**, above the desk's 75% flag; exit multiple 10.0x FY31 EBITDA, slightly above the c.9.75x the market pays today.
- **Minorities:** 2.566% x EV = USD 1,703m.

Bridge (USD m): EV 66,356 - net debt 20,482 - minorities 1,703 - restructuring cash 850 + associates 5,284 + disposal proceeds 3,318 = equity 51,923 at 30 June; 53,236 at 12 Oct; 2,224m shares = **1,808.8p**. The price is the 12 Oct close, **cum-dividend**: the 30c final dividend (about 22.6p) went ex on 15 Oct, so later prices are not like-for-like. ERP: 5.5% gives 1,525.7p; SELL above 5.61%, BUY below 3.76%. Comps: median P/E 18.5x on four peers implies 2,311p (DCF 21.7% below); P/E only, two peers press-sourced, little weight.

Value per share (p)	g 1.5%	g 2.0%	g 2.5%	g 3.0%
WACC 6.92%	2,137	2,261	2,411	2,599
WACC 7.42%	1,919	2,014	2,126	2,264
WACC 7.92%	1,736	**1,809**	1,894	1,996
WACC 8.42%	1,579	1,636	1,701	1,778
WACC 8.92%	1,443	1,488	1,538	1,597

Fundamentals

- **Growth has stalled:** organic growth was 6.5% (FY23), -0.6%, 1.7% and -2.0% (FY26). Africa (13.3%) and Latin America & Caribbean (7.7%) grew.
- **Margins compressed:** operating margin before exceptionals fell from 31.1% (FY22) to 28.9% (FY26).
- **Cash improved:** free cash flow rose from USD 2,235m (FY23) to USD 3,211m (FY26), helped by lower capex (6.1% of sales in FY26).
- **Returns fell:** ROIC went from 18.4% (FY23) to 13.4% (FY26); interest cover fell from 13.6x (FY22) to 7.0x (FY26).

Risks

- **Beta:** we use 0.96 (bottom-up), above all six regressions of Diageo's own shares (0.37 to 0.77). 0.72 gives 2,107p (BUY); BUY if beta is below 0.860, SELL above 1.282.
- **Volatility:** 31.6% (1 year) vs 12.5% for the FTSE 100.
- **Drawdown:** maximum -66.8%, from 4,098p (4 Jan 2022) to 1,362p (24 Mar 2026).
- **Leverage:** 3.14x adjusted net borrowings / adjusted EBITDA vs a 2.5-3.0x target. "About 2.6x after the disposals" is a floor: it is before tax on the proceeds and still counts EABL's EBITDA, which leaves with the sale, so true leverage is higher.

Bear case and our response

No single business challenge now flips the rating to SELL (three did on 13 Oct). All values below are pence (GBp); responses are the PM's of 13 Oct, written against the old values.

1. **Flow-through: most savings are reinvested.** 33% gives 1,762.2p, 25% gives 1,733.6p (HOLD). **Response:** 46% is the low end of FY27-29 profit guidance; we will check it against FY27 interim margins.

2. **Terminal returns: ROIC fell 5 points in three years.** RONIC 10.8% gives 1,735.9p; RONIC equal to WACC gives 1,599.0p (HOLD; was SELL). **Response:** 13.4% is Diageo's lowest ROIC in four years, not a recovery, and FY26 capex (6.1% of sales) is close to the 6.21% the rule implies.

3. **No recovery: both 2023-26 incentive targets missed.** Zero organic growth gives 1,656.8p (HOLD; was SELL). **Response:** the path is already the low end of guidance; five years of zero growth is our bear scenario, not the base.

4. **Terminal growth 2% vs falling spirits volumes.** 1.5% gives 1,735.9p (HOLD). **Response:** with 2.35% breakeven inflation, 2% nominal already means a small real decline; the IWSR figures are secondhand.

5. **Cost of capital.** Kroll's 5.0% ERP gives 1,625.5p (1,545.7p with Kroll's 20-year 5.60%); 5.5% gives 1,525.7p; beta 1.00 gives 1,766.0p; a 2.0% credit spread 1,728.3p (all HOLD). **Response:** our 1% spread is about the BBB average (1.02%, vs 0.69% for A-rated). ERP: PM to respond once 4.2% is confirmed at source.

6. **USL minority at market** (USD 5,778m with others at book): 1,666.8p (HOLD; was SELL). **Response:** an upper bound: USL's minority at market but Diageo's 57.21% at the DCF multiple, and the USD 1,328m still includes EABL's 35%.

7. **Data inputs (audit).** Proceeds are gross (-3.5p per USD 100m of tax); diluted shares (2,231m) give 1,803.1p. **Response:** PM to respond.

What flips the rating. Alone, only the discount rate: SELL if ERP is above 5.61% or beta above 1.282; BUY if ERP is below 3.76% or beta below 0.860. SELL otherwise needs a stack: the audit's bear lines with ERP 5.5% (1,439.4p) or with flow-through 33% and beta 1.00 (1,449.8p). A broad business bear at ERP 4.2% gives 1,609.6p, still HOLD but 3.8% below the price.

Open items (MISSING): peer EV/EBITDA and FCF yield, Constellation Brands EPS, calendarised peers, Moet Hennessy fair value, USL net cash, split of the USD 1,328m other minorities, tax on the disposals, UK or global implied ERP.
