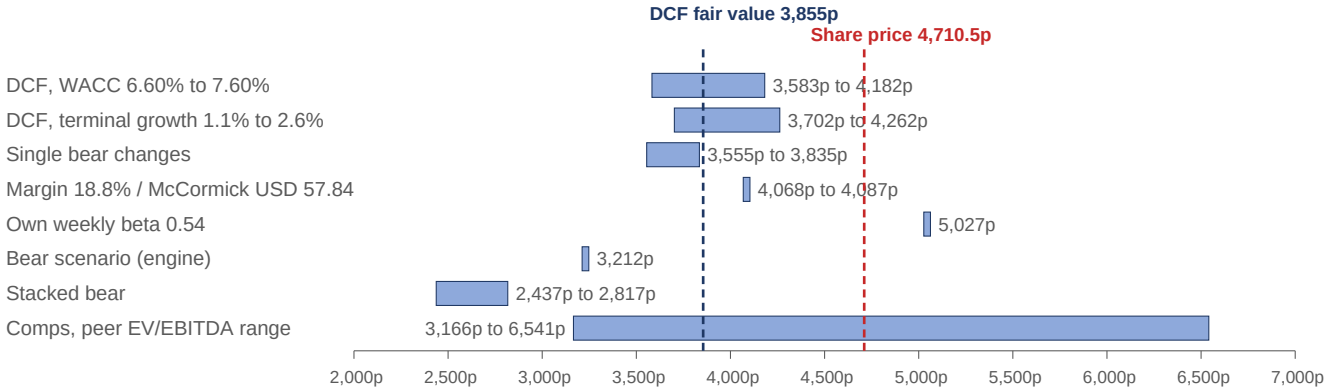
Unilever PLC (LSE: ULVR)

SELL	Desk rating: SELL (PM confirmed 14 Oct 2026)	Fair value 3,855p	Share price 4,710.5p (13 Oct 2026 close)	Upside -18.2%	Bear case 3,212p

Memo of 14 October 2026. Desk rule: BUY at +15% or more, SELL at -10% or worse. **HOLD starts at 4,239p, BUY at 5,417p.** Per-share values in pence (GBp); totals in EUR m (Unilever reports in euros), converted at EUR 1.18190 per GBP; 2,154.3m shares.



Thesis

- **The price already assumes a best case for the business that remains.** At 4,710.5p the market pays 14.7x EBITDA for Unilever without Foods, against a peer median of 11.9x and a DCF exit multiple of 10.9x. The DCF (3,855p) and the comps median (3,911p) agree within 1.4%.
- **A third of the value is the McCormick deal at today's price, before tax.** The Foods consideration is 1,334p a share (35%). McCormick is at USD 44.64, 23% below the USD 57.84 deal reference, and the tax on the USD 15.7bn cash is MISSING (each EUR 1bn = 39.3p).
- **A firm SELL.** The value is 384p (8.2 points) inside SELL. The only sourced input that reaches HOLD is Unilever's own weekly beta of 0.54 (5,027p). A margin of 18.8% (4,068p) and McCormick back at its deal price (4,087p) both stay SELL. No sourced test reaches BUY.

Valuation: a sum of the parts

In plain words: we value Unilever as if Foods were already sold. (1) A DCF of the business that remains (Home and Personal Care, without the Foods perimeter), less the outside shareholders' share; (2) plus what McCormick pays for Foods, at today's McCormick price; (3) plus Unilever's stakes and joint ventures; (4) less net debt and other claims.

- **Growth (EUR, ex-Foods):** base sales EUR 39,803m; +0.5% in FY26, then 1.6% a year FY27-30 (USG less currency drag).
- **Margin:** 17.7% flat (ex-Foods underlying 18.8% less 1.1% recurring restructuring). Savings flow-through: none (no programme modelled). Tax 26.0%; capex 3.15%, D&A 2.6% of sales.
- **WACC 7.10%:** German Bund 3.45% (run date, PM decision 11), beta 0.8844, ERP 5.0%, cost of equity 7.872%; cost of debt 4.15% (Bund + 0.70% single-A spread); debt weight 16.13%.
- **Terminal:** growth 1.6%, RONIC 17.8%. Terminal value is 75.7% of EV (FLAG, limit 75%); exit 10.9x EBITDA.

Bridge (EUR m, 31 Dec 2025): EV 91,140 - minorities 9,737 (10.684% of EV) - net debt 23,076 (leases inside) - stranded-cost restructuring 500 + stakes and JVs 7,062 + Foods consideration 33,955 = 98,844; rolled to 98,163 at 14 Oct 2026 = **EUR 45.57 = 3,855p**.

Where the 3,855p comes from	Pence	Share
DCF of the remaining business (EV 3,799p) less minorities (-406p)	3,393	88%
Foods consideration (McCormick deal at today's price)	1,334	35%
JVs 155p, TMICC stake 76p, investments/associates/Magnum balance 59p	290	8%

Where the 3,855p comes from	Pence	Share
Net debt -962p, restructuring -21p, dividends since Dec -119p, buyback -59p	-1,161	-30%

Value per share (pence)	g 1.1%	g 1.6%	g 2.1%	g 2.6%
WACC 6.10%	4,329	4,581	4,894	5,296
WACC 6.60%	3,987	4,182	4,419	4,714
WACC 7.10%	3,702	**3,855**	4,039	4,262
WACC 7.60%	3,461	3,583	3,727	3,899
WACC 8.10%	3,254	3,353	3,468	3,603

Comps: peer median EV/EBITDA 11.9x (7 HPC peers) gives 3,166p / 3,911p / 6,541p; four peers use Yahoo data, so medium-low weight.

MISSING, not in the value: tax on the Foods cash (39.3p per EUR 1bn; a 25% stress, EUR 3,507m, is 138p); Foods cash flows from 1 Jan 2026 to closing (indicator only, about EUR 2.9bn, about 113p); a primary source for the run-date Bund yield (3.45% is from a data aggregator, flagged by the PM). Receiving the consideration at closing (mid-2027) costs 16p to 70p.

Engine fixes in this run: the H1 2026 buyback (EUR 1,507m) is deducted, and run-date prices (Foods, TMICC) are not grown at the cost of equity (-86.5p on today's inputs).

Fundamentals

- **Weak euro growth:** USG 4.5%, 9.0%, 7.0%, 4.2%, 3.5% (FY21-25), but turnover fell 3.8% in euros in FY25 after currency. The remaining company has 62% of turnover in emerging markets.
- **Margins at a peak:** underlying 18.4%, 16.1%, 17.6%, 19.4%, 20.0%; restructuring recurs at 0.8-1.4% of turnover every year.
- **Returns solid:** underlying ROIC 19.0% (FY25); 17.8% after restructuring. The ex-Foods ROIC is not disclosed.
- **Mix:** Personal Care 22.6% margin, Beauty & Wellbeing 19.2%, Home Care 14.9%; Foods perimeter 24.3%, remaining company 18.8%.

Risks

- **Beta:** 0.8844 bottom-up (Damodaran global Household Products 0.7741, relevered at D/E 0.1924). Unilever's own regressions vs the FTSE 100 give 0.43 (2y weekly), 0.54 (5y weekly), 0.91 (5y monthly), R-squared 0.08-0.30. HOLD needs 0.748 (the main risk to the call); other flip points: WACC 6.52%, margin 19.7%, McCormick USD 66.55.
- **Volatility:** 22.4% (1 year) and 19.2% (5 years) vs 11.6% and 12.5% for the FTSE 100. McCormick, which sets a third of the value, has 30.5%.
- **Drawdown:** -25.5% over 5 years, 5,470.6p (24 Feb 2026) to 4,077.7p (4 Jun 2026), dividend-adjusted, spanning the Foods announcement.
- **Leverage:** net debt / underlying EBITDA 2.03x (Dec 2025) and 2.27x (Jun 2026, after the buyback) vs a c.2x target; rated A+/A1. The WACC uses pre-sale leverage (not sized).

Bear case and our response

Every sourced bear test stays SELL. Values in pence per share, impact vs 3,855p.

Challenge	Test: value (impact)	Response
1. Foods consideration worth less	Tax 25% of cash: 3,718p (-138p); McCormick -1 s.d. (USD 33.15): 3,654p (-201p); deal fails: +1p to +37p (roughly neutral)	Risk, not a base change: McCormick at the 13 Oct close; Foods tax undisclosed, shown per EUR 1bn
2. 17.7% margin is a peak	16.2%: 3,566p (-290p)	Keep 17.7%: already below reported underlying margin after the sale perimeter and recurring restructuring
3. HUL minorities at market	3,632p (-224p) to 3,555p (-301p)	Keep proportionate (Diageo rule); market value shown as the bear line
4. Growth and terminal value	Terminal growth 1.1%: 3,690p (-166p); RONIC = WACC: 3,473p (-383p)	Partly accepted: 1.6% is at the top of the evidence range and terminal value is flagged; RONIC = WACC is an extreme case
5. Discount rate	Bear with JVs at Ke + 1 pt: 3,191p (-21p); beta 0.9998: 3,588p (-267p)	Keep the latest Damodaran beta; the bear's is an older 2020-24 average

Stacked bear (engine bear + JV fix + 16.2% margin + 25% tax): 2,817p; with HUL at market 2,437p. **PM view (14 Oct 2026):** every sourced bear test stays SELL, so the bear case supports the call; the main risk runs the other way (a lower beta).
